// PERFORMANCE DIRECTOR CLINICAL IMPRESSION

SEC-ID: PULSE-NVC-498

Subject displays exemplary bilateral lean mass equilibrium with zero critical neuromuscular asymmetries detected. Visceral fat levels place candidate in the upper 99th percentile for cardiovascular longevity. T-score correlates with high resistance adaptation. Approved for maximal VO2 velocity thresholds and Olympic compound loading.

Attending: Dr. JuLlian Thorne, PhD, CSCS+D

Facility: Pulse360 Flagship Rio-Lab (Hudson Yards)
